- DBMS - MySQL, MongoDB
- Version Control - GIT
- Debugging and Testing

## FRAMEWORKS AND DEPLOYMENT

- Heroku, Azure Cloud Services, GitHub, ExpressJs

## PROFESSIONAL EXPERIENCE

**CANARA - SWO Analyst (3.9 years)** 2019- Present

### CPH TOOL

- Troubleshooting problems faced by Employees with CPH Tool. Due to the increase in the customer base in branches, It was impossible to open accounts within a Day. To troubleshoot this problem CPH tool was made to provide Employees a Software that can take all the customer's input just by fetching details from their Aadhar cards.

### ORACLE FLEXCUBE

- As a team manager, I am working as a line of communication between frontline staff and senior management troubleshooting problems faced by employees in the banking software system Flexcube. Oracle FLEXCUBE is Universal Banking software that accelerates business agility, streamlines connectivity and optimizes operations.

### CANNET

- Troubleshooting problems faced by Employees with Cannet which is a Banking Employees' Platform for their Internal use. Providing features like checking their progress to check their branch progress, find fraud status of any customer, and check customers CIBIL Score and tones of features.
